

## InvisiSolv

### Invisible Solvent Flourescent Blue Ink

Item # 193627

- Produces a very dense, sharp image
- Outstanding unassisted dry time
- Excellent adhesion on non-porous substrates
- Up to 600 dpi resolution

*Solvent based invisible ink that shows high intensity blue color under UV wavelength (365nm or 395nm). Ideal for security and identification printing applications. Offers excellent adhesion on a wide range of non-porous substrates, e.g., foil, film, plastics, glossy substrates, etc. Produces a sharp, very dark image with good bar code readability. Outstanding unassisted dry time with excellent decap of 90 minutes.*

#### Recommended Pen Parameters

Pen Drive Voltage	9.2 V
Fire Pulse Length	1.9 $\mu$
Pulse Warming	OFF

#### Printhead Performance

Decap time	> 1 h
Shelf life	6 months
Throw distance	< 3 mm

#### Cartridge Maintenance & Handling

- Wipe and purge cartridge before use.
- Use only a dry lint-free cloth to wipe head if needed.
- Place cartridge clip on cartridge when not printing.
- Do not shake cartridge (may cause air bubbles)

#### Operating & Storage Conditions

- Operating conditions: 41°-104° F (10°-40° C).
- Storage conditions: 41°-104° F (10°-40° C).
- Orientation: nozzle up or side way
